SUMMARY

AI-focused Software Engineer specializing in LLM-based systems, agentic workflows, and computer vision pipelines. 3+ years building production-grade backend systems in Java (Spring Boot) and Python (FastAPI/Flask), with hands-on experience deploying AI automation at scale using LangGraph, Claude (AWS Bedrock), and YOLO. Passionate about turning cutting-edge AI research into reliable, business-critical software.

EXPERIENCE

Software Engineer

Aug. 2025 – Present

eSpace

Alexandria, Egypt

- Architected an end-to-end agentic AI system with LangGraph and Claude (AWS Bedrock) that parses corporate documents into a structured knowledge graph, automatically surfaces business opportunities, and generates tailored pitch decks, reducing a multi-day manual process to minutes.
- Delivered production features for *The Space*, a smart workspace reservation platform serving thousands of users, building RESTful APIs and data models with Java Spring Boot, Hibernate, PostgreSQL, and Redis-based caching to improve response times and system scalability for thousands of users in an Agile/Scrum environment.
- Built a custom Android Automotive navigation application from the ground up, integrating Traccar-based fleet tracking, GraphHopper offline routing, and asynchronous processing pipelines to deliver a production-ready enterprise navigation solution that secured a new client contract.
- Contributed to AISOC, a cybersecurity operations platform built on a microservices architecture, implementing Spring Boot services integrated via Kafka topics for event-driven communication, alongside async processing pipelines and automated testing (JUnit/Mockito) to support real-time threat monitoring and scalable security workflows.

Software Engineer

Dec. 2023 – Jul. 2025

White Peaks Solutions

Remote

- Engineered an AI highlight detection pipeline for KWIKMotion that automatically identifies and clips key moments from long-form video, cutting manual editing time significantly and enabling a new short-form content product line.
- Built automated multilingual transcription and translation using OpenAI Whisper, enabling KWIKMotion to expand into Arabic-language markets and establish partnerships with Rotana and MBC.
- Re-architected KWIKMotion's AI video cropping system for AlArabiya using YOLO, improving subject-framing accuracy by 50% and cutting per-video processing time by 30%, directly increasing platform retention.

Python & Algorithms Tutor

Mar. 2025 – Present

Freelance

Remote

- Mentor beginner developers in Python fundamentals, OOP, and algorithmic problem-solving; designed structured curricula that accelerated students from zero to independently solving LeetCode-style problems.

EDUCATION

Alexandria University

Sep. 2018 – Jun. 2023

B.Sc. in Computer Engineering

GPA: 3.38

CERTIFICATIONS

AWS Academy Cloud Foundations — AWS Academy Machine Learning Foundations — Huawei HCCDP-GaussDB Developer

TECHNICAL SKILLS

Languages: Python, Java, SQL, C, JavaScript, TypeScript

AI & ML: LangGraph, LLMs (Claude / AWS Bedrock), YOLO, OpenAI Whisper, TensorFlow, PyTorch

Backend: Spring Boot, Hibernate, FastAPI, Flask, Node.js, NestJS

Mobile & Embedded: Android SDK, Android Automotive, OSMDroid, GraphHopper, Traccar

Infrastructure & Tools: AWS, Docker, PostgreSQL, Redis, MySQL, Git, Linux, Postman, Jira, Swagger
